1 Section 1

2 Introduction

This talks about the rocket equation. This is in the field of rocketry

3 Section 2

This talks about the iris data set. The Iris flower data set or Fisher's Iris data set is a multivariate data set introduced by the British statistician and biologist Ronald Fisher in his 1936 paper The use of multiple measurements in taxonomic problems as an example of linear discriminant analysis. [1]

This is the data set most used for testing machine learning.
